

ALLERGY POLICY INCLUDING ANAPHYLAXIS ALLERGY

*Please read this policy alongside the school's
Healthy Eating, Health & Safety and Administering of Medicines Policies*

This policy is concerned with the whole school approach to the health care and management of members of the School community suffering from allergies including serious specific allergies. The School's position is not to guarantee a completely allergen free environment; rather, to minimise the risk of exposure, encourage self responsibility, plan for effective response to possible emergencies and become an 'allergy aware' environment. The School recognises that it may arise that a pupil(s) will suffer from potentially life threatening allergy to certain foods (nuts, nut related food, dairy products, eggs etc) or toxins from insects. We recognise that the allergy to nuts is the most common high risk allergy, and as such demands more rigorous controls throughout the school (than the controls for allergies to dairy products, wheat products, gluten, eggs, wasps and bees etc).

The intent of this policy is to minimise the risk of any student suffering an allergy especially an allergy induced anaphylaxis whilst at school or attending any school related activity, and to ensure staff are properly prepared to manage such emergency situations should they arise.

DEFINITIONS

Allergy	A condition in which the body has an exaggerated response to a substance (e.g. food or drug). Also known as hypersensitivity.
Allergen	A normally harmless substance that triggers an allergic reaction in the immune system of a susceptible person.
Anaphylaxis	Anaphylaxis, or anaphylactic shock, is a sudden, severe and potentially life-threatening allergic reaction to food, stings, bites, or medicines.
EpiPen	Brand name for syringe style device containing the drug Adrenalin which is ready for immediate inter-muscular administration.
Health Management Plan	A detailed document outlining an individual students' condition, treatment, and action plan for location of EpiPen.

THE SCHOOL'S KEY GUIDELINES ARE TO

- Identify the student with the food allergy in the school. Laminated list of pupils in a particular classroom with allergies adhered to teacher's desk. Master list in office, medicine cabinet and with learning support teachers;
- Have a written emergency action plan detailed within an individual 'Health Management Plan' for managing an anaphylactic reaction from parents and child's doctor;
- To implement this general rule: if there is a child within a class that has a nut allergy, no nuts or nut products should be put into lunchboxes for any child in that class. If a child brings in an obvious nut related product such as nuts or peanut butter, they will be asked not to open or eat it.

THE GENERAL PRINCIPLES OF THE PREVENTIVE PLAN INCLUDE THE FOLLOWING

- Avoidance to allergens followed at home should be applied to the classroom (these should be detailed by the parent in the child's Health Management Plan);
- There is a 'no share food' policy school wide (including no party / treat packs from home);
- Where food is consumed, the following must be in place:
 - hand washing;
 - no food sharing;
 - routine cleaning of surfaces where food is consumed to avoid cross contamination;
- Every student with life-threatening allergies must have a medically prescribed epipen in the school. The epipen needs to be accessible for quick access within several minutes of a reaction and kept in a secure location. In St. David's, children's epipens can be stored in the First Aid cabinet in the Staffroom for central access.

THE SCHOOL IS COMMITTED TO PROACTIVE RISK ALLERGY MANAGEMENT THROUGH

- The encouragement of self-responsibility and learned avoidance strategies amongst students suffering allergies;
- Provision of a rigorous staff education / training programme on anaphylaxis when required;
- The establishment of specific risk exposure minimisation practices and strategies wherever required within the School operations;
- Close liaison with parents of students who suffer allergies.

SCHOOL'S RESPONSIBILITY

- Follow the procedures laid out in this policy;
- Understand the causes, symptoms and treatment of anaphylaxis. Be able to recognise symptoms, know what to do in an emergency, be prepared to handle an allergic reaction;
- Be aware of the students in their care who are at risk from such reactions;
- Review and be aware of health records and the 'Health Management Plan' submitted by parents. Keep this Health Management Plan within easy access at all times and within the child's school file;
- Ensure that members of staff are properly trained in administering the epipen to a child in their care when required;
- Review policy, procedure and individual 'Health Management Plan' after a reaction has occurred;
- Promote school's Healthy Eating Policy;
- Implement a 'No share policy' in every classroom school wide;
- Know where each child's epipen is kept (First Aid cabinet in the staffroom);
- If food rewards are used, they cannot be a 'may contain nuts' product. Teachers should however avoid the use of food treats in class or as rewards, as these may contain hidden allergens. Instead, non food rewards are recommended;
- Ensure that tables and surfaces are wiped down regularly and that students wash their hands before and after handling food;
- Be aware that students are at most risk when:
 - Their routine is broken,
 - At yard or during eating times,
 - On school tours,
 - Immediate access to medical services is not available,
 - Staff changes occur (sub teacher etc),
 - Participating in activities involving food;
- Become familiar with the concept of "hidden" nut ingredients, not only in foods but also in non-food items that may be used in classroom projects in arts and crafts, maths and science. Reading the ingredient labels of foods, as well as other items such as bird feeders and pet feed, becomes an additional responsibility of the class teacher;
- Children are encouraged to eat out of their lunchbox and to wash their hands before and after eating to avoid cross contamination;
- If a child brings a potential allergen to school (Known Allergens: egg, nuts, milk, celery, wheat, gluten, kiwi, shellfish, soy, fish, sesame, mustard, sulphites), the following will happen in a classroom where there is a child with an allergy to that item:

- Nuts and nut products cannot be opened or eaten in the classroom;
- No sharing of lunches.

EVERY FAMILY'S RESPONSIBILITY WHEN THERE IS AN IN SCHOOL ALLERGY CASE

- Not to send their child to school with:
 - packets of nuts,
 - peanut butter or almond butter etc,
 - Nutella or any other similar hazelnut spreads,
 - products containing nuts (snack bars etc),
 - Pesto;
 - Party / treat packs for children in the class;
- Avoid sending:
 - Items from list of Known Allergens;
- Be allergy aware;
- Teach their children to eat out of their lunchbox;
- Support the school in the implementation of this policy;
- Support the school's Healthy Eating Policy.

CHILD WITH ALLERGY'S FAMILY'S RESPONSIBILITY

- Notify the school of the child's allergies on diagnosis or enrolment. Provide the Principal with an immediate update if there is a change to their child's condition;
- Provide written medical documentation, instructions and medications as directed by a physician, creating the 'Health Management Plan' so that staff will know how to react should their child have an allergic reaction;
- Provide properly labelled medications (normally an epipen and anti-histamines) and replace medications after use or upon expiration;
- Provide easily identifiable lunch – label easily recognised by the child;
- Supply alternative food options for their child when needed, e.g. on Pancake Tuesday. (the school will give advanced notice of events such as these);
- Support the school in the implementation of this policy;
- Educate the child in self management of their food allergy including:
 - Safe and unsafe foods to eat;
 - Strategies for avoiding exposure to unsafe foods;
 - Symptoms of allergic reactions;
 - How and when to tell an adult they may be having an allergy related problem;

- How to read food labels (age appropriate)
- Provide emergency contact information and inform the school if this information changes;
- Review procedure with the school staff, child's doctor and the child (if age appropriate) after a reaction has occurred.

CHILD WITH ALLERGIES RESPONSIBILITY

- Should not trade food with others – no share policy;
- Should not eat anything with unknown ingredients or known to contain an allergen;
- Should notify an adult immediately if they eat something they believe may have contained the food to which they are allergic;
- Should notify an adult immediately if they feel they are beginning to get an allergic reaction.

PROCEDURE DURING A SEVERE ALLERGIC REACTION

Incidents of severe allergic reactions will be responded to according to each child's individual Health Management Plan. If a child with an unknown allergy has a severe reaction, the school will call emergency services and follow the directions given.

RAISING STUDENT & PARENT AWARENESS

It is important to work with the whole school community to better understand how to provide a safe and supportive environment for all students, including the student with severe allergies. Peer support and understanding is important for the student at risk of anaphylaxis. The following key messages should be given to children:

- Take allergic reactions seriously – serious allergies are no joke;
- Don't share your food with your classmates;
- Not everyone has allergies – discuss common symptoms;
- Wash your hands before and after eating;
- Know what your friends are allergic to;
- If a schoolmate or teacher becomes sick, get help immediately;
- Be respectful to all school friends.

Parents will be made aware of this policy through the school website. Parents in a class where there is a child with allergies will be informed about foods that should not be brought to school via a letter.

REVIEW MANAGEMENT STRATEGIES

If a student has experienced an anaphylactic shock:

- The child's epipen must be replaced
- The school together with parents will review the Health Management Plan (the child's doctor's input would be very valuable at this time).
- Appropriate steps must be taken to reassure parents, these may include:
 - Taking further steps to reduce the child's exposure to allergens;
 - Closer monitoring of student by staff;
 - Training updates for staff.

RATIFICATION

- This policy was ratified by the Board of Management on **date below**.
- It will be reviewed as required especially with new developments in managing allergies.
- The policy will be available in the school for parents to view.

Ratified by Board of Management on: 23-1-23
